## Our Mission Statement

*Bee Psyched is a trauma-informed psychology practice. We are passionate about providing treatment and support to all people, no matter their age, culture, beliefs, or walk of life. We are a family-operated business, united in our mission to provide compassionate, friendly, and accessible therapeutic services.*

*We care about what has happened **to** you - not what is 'wrong' with you. To us, psychology is so much more than diagnosis and following a treatment plan. It is the process of understanding and connecting with another person – human being to human being – and then working towards wellness – whatever that may be for each of our clients.*

*For our clients, their loved ones, and their support team, we strive to provide effective service in a warm, respectful, and professional manner.*

*We look forward to assisting you.*

Dr Bianca Heng  
Director and Clinical Psychologist
